

## **Disinfectant/sanitizer**

By Food Engineering

Thursday, September 1, 2011

PURE Bioscience PURE hard surface disinfectant and food contact surface sanitizer contains silver dihydrogen citrate (SDC) antimicrobial, which has received GRAS self-affirmation when used on food processing equipment, machinery and utensils. EPA-registered for use on food contact surfaces, the disinfectant/sanitizer has 30-second bacterial kill times and 24-hour residual protection. It kills resistant pathogens like MRSA and eliminates food pathogens such as E. coli, Salmonella and Campylobacter, as well as fungi and viruses including Norovirus, HIV, Influenza A, Avian Influenza and H1N1.
