SpectraSan 24

Disinfects in as little as 30 seconds

Based on the patented silver dihydrogen citrate (SDC) molecule, SpectraSan24™ is an EPA-registered, broad-spectrum antibacterial, antifungal, and antiviral disinfectant from PURE Biosciences, El Cajon, Calif, that can provide up to 24-hour residual effectiveness. It kills most dangerous pathogens, including influenza A (H1N1), MRSA, HIV, and a host of other household germs—many within 30 seconds. The disinfectant is nontoxic, odorless, noncorrosive, and nonflammable. The ionic silver in SDC prevents bacteria from forming resistance to the disinfectant.
